Maths Challenge 2014 Answers 1

May 2014 Junior Mathematical

Challenge 2014 Solutions and

investigations 1. What is $(999 - 99$

$+ 9) \div 9$? A 91B 99C 100D 101E 109

Solution D We can calculate the

value in more than one way. One

method is to first work out the

value of the expression in the

brackets and then divide the result

by 9. This gives $(999 - 99 + 9) \div 9$

$= 909 \div 9 = 101$. Junior

Mathematics Trust Another Maths
Challenge, this time to do with the
upcoming FIFA Football World Cup.
A range of topics are covered for
upper end KS2, lower end KS3.
Answers have been attached too.

****Please note Australia is classed as Asia for the Fifa World Cup and not Oceania -> Fifa.com**** World Cup 2014 Maths Challenge | Teaching Resources If $w = 2$, then $2000 + 200x + 30y + 4z = 2014$ and so $200x + 30y + 4z = 14$ or $100x + 15y + 2z = 7$. This would mean that $x = y = 0$ (since otherwise the terms $100x + 15y$ would contribute more than 7), which gives $2z = 7$ which has no integer solutions. Thus, $w \neq 2$. Therefore, $w = 1$. This gives $1000 + 200x + 30y + 4z = 2014$ and so $200x + 30y + 4z = 1014$ or $100x + 15y + 2z = 507$. 2014 Cayley Contest - CEMC Nov 2019 - Paper | Answers and Notes.
